

Hakomatic E/B 10

Compact, robust,
handy.

Contract
Cleaning

Hakomatic E/B 10

The advantages of the small, handy, robust scrubber-driers:

- Optimum up-take of the dirty solution, in particular in areas close to edges thanks to the automatic squeegee for forward/reverse drive.
- Low height for cleaning underneath obstacles (working under tables etc. possible).
- Space-saving transport and storage as a result of a folding operating handle, which is adapted to fit the contours.
- Working close to the edge as a result of the protruding cylindrical brush head saves intensive work afterwards.
- Twin cylinders for optimum cleaning of structured floors and joints.
- Easier and quicker change of cylindrical brushes.
- Easy filling and emptying as a result of removable tanks.
- Stairs or half landings can be overcome easily due to the wheel geometry (wheel $\varnothing = 175$ mm).

Additional advantages of battery power:

- Work without cables – high productivity in restricted, narrow or congested areas.
- System with quick change battery for long running times – battery can be changed in next to no time.
- Battery running time to suit the tank capacity.
- Maintenance-free batteries with a high battery life.
- Compact, removable battery.

Technical Data Hakomatic

		E 10	B 10
Working width	mm	350	350
Effective suction width	mm	450	450
Theoretical area performance up to	m ² /h	1400	1400
Rated voltage	V/Hz	230/50	24/DC
Power output brush motor	W	600	430
Battery capacity	V/Ah ₅	-	24/25
Pressure	mm/WC	1860	1020
No. of brushes	Units	2	2
Brush revolutions	rpm	650	650
Brush pressure	kg	21,5	21,5
Brush diameter	mm	100	100
Tank capacity, dirty/clean water	l	10/11	10/11
Transport dimensions (L/W/H)	cm	68/47/55	68/47/55
Weight, empty	kg	43	40
Weight, ready for operation	kg	53	74
